[www.gviz.com.au](http://www.gviz.com.au)

gViz is committed to using GIS technology to enable better decision making through geographic visualisation. This passion for GIS results in increased effectiveness, organisational value and appreciation for GIS.

## Partnering with gViz

If you want a consultative approach, where gViz partners with you to deliver successful, cost effective, best practice ESRI GIS solutions, to suit your GIS budget then gViz might be the alternate approach you have been waiting for.

## The gViz offer

### GIS Solutions

#### CITYWORKS

gViz is the exclusive distributor of ESRI based, GIS Asset Maintenance Management System, Cityworks®. Developed by ESRI Business Partner, Azteca Systems, Cityworks® is the only solution of its kind to use the ESRI Geodatabase and ESRI technology to provide a GIS centric solution deployed as an ArcGIS Desktop extension, ArcEngine or ArcGIS Server web application.

Cityworks solutions provide the operational day to day requirements for operational or Works Management.

**Cityworks® is your ideal mobile, back office and enterprise ESRI GIS based Asset Maintenance Management System.**

#### RIVA

Riva solutions provide a decision support framework to achieve financial sustainability and plan for the service delivery of Asset Management. Riva solutions provide for long range planning, tracking capital projects from evaluation through to construction, enterprise inventories for integrating databases, asset inventories and reporting.

**Riva's modeling products are your ideal strategic asset modeling solutions to achieve sustainability in your organisation.**

### Enterprise Consulting

So whether it be, a new GIS implementation upgrading to take advantage of new technology or implementing a GIS project, gViz Enterprise Consulting services are designed to meet all aspects of GIS project planning and implementation in a transparent, independent, and cost effective approach.

**Minimal project overheads, best practice services, costed to meet your GIS budget.**

### Professional Services

A unique approach in the GIS industry. gViz offers clients an alternative professional services model. GIS technology, development, data maintenance and system deployment, gViz Professional Services are the technical skills you need, whether it be for system administration, workshops in the application of technology with technical skills made available at your direction, with guidance from gViz.

**gViz Professional Services, "partnering for successful outcomes!"**

Passionate about the application of ESRI GIS technology, gViz is the exclusive distributor of ESRI based Asset Management solutions, Cityworks® and Riva®. Complemented with fixed price Enterprise Consulting solutions and flexible, cost effective Professional Services options, gViz provides a range of Asset Management software and services to deliver increased GIS effectiveness and unprecedented corporate value and appreciation for GIS.

With unlimited enthusiasm for the possibilities of GIS, gViz is committed to GIS and GIS professionals.

**This is the gViz passion – the ability to make a difference!**
